

Prof. Michele Vignali

Full professor in Obstetrics and Gynecology at the Department of Biomedical Sciences for Health of the University of Milan and Chair of Obstetrics and Gynecology at Macedonio Melloni Hospital in Milan.

I have also a Ph.D. in "Endoscopic Techniques in Gynecology" at the University of Milan. My research is focused on Endometriosis disease and on fibroids. As PI or co-Investigator I collaborated with other researchers, and produced several peer-reviewed publications. Some projects are still ongoing. I participated as a speaker/chairman at more than 150 national and international scientific events and coordinated the scientific secretariat of several scientific meetings. As first operator I performed more than 5000 surgical vaginal, abdominal and endoscopic procedures in benign gynecology, especially endometriosis.
